Manchester Metropolitan University Research Institute for Health & Social Change

1. Social Capital and Thriving Communities.

This is a board game which can be played individually or in teams. The aims of the game are to: gain understanding of the nature of thriving communities in terms of community cohesion; health and wellbeing; life-long learning; and sustainability; explore the limitations of the concept of social capital in creating and maintaining thriving communities; and gain insight into the risks of marginalisation experienced by some people.

Price: £30; double set £55 plus postage

Each kit includes a canvas 'board'; four packs of cards; 6 counters; a dice; an instruction sheet; a bag of beans (social capital credits) and a duffle bag to keep everything together.

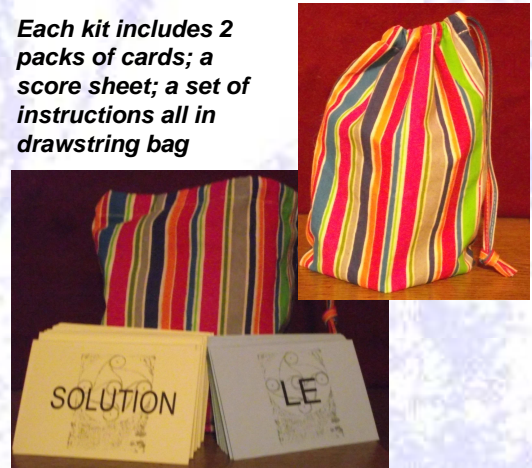

Double set: two of everything in one duffle bag

2. Community Psychological Solutions to Problems.

This is a card game which can be played individually or in pairs and aims to: gain understanding of the experiences of those who are marginalised by the social system; explore different level solutions to people's problems; understand the limitation of community psychological interventions.

.Price: £5.00 plus postage

Each kit includes 2 packs of cards; a score sheet; a set of instructions all in drawstring bag

Quantity: Cost:

1. Social Capital and Thriving Communities.
